Casa Delia In a little hamlet, not far from the town of Castiglione del Lago and the lovely lake, enchanting semi-detached house. The house is like from a fairy tale, with its main apartment on the first floor and a guest flat and garage on the ground floor. The main apartment can be reached by an external staircase or by a spiral staircase from the inside and consists of a large living room, kitchen, dining room, double bedroom and bathroom. What I really like about the house is that it is bright and airy, and all on one level.
